Education

Indian Institute of Technology (ISM) Dhanbad — **Dec 2021 – May 2025**

Bachelor of Technology in Electrical Engineering — *Dhanbad, Jharkhand*

Experience

Pursuit Software — **June 2025 – Present**

Full Stack Software Engineer — *Kolkata, West Bengal*

- Built **5 production applications** end-to-end across React.js, React Native, Next.js, Node.js, and Python backends — shipping responsive, cross-platform UIs from UX mockups with full feature parity on web, tablet, and mobile
- Developed a full-scale real estate CRM web platform (React.js + AWS Lambda) with **30+ REST API endpoints**, lead management dashboards, booking flows, and role-based analytics — handling **10,000+ API requests/day** at **99.9% uptime**
- Built two production React Native mobile apps (iOS & Android) with Salesforce CRM integration, offline-first SQLite queuing, barcode scanning, GPS geo-fencing, and AWS S3 media uploads — reduced field data entry errors by **80–90%**
- Architected a full-stack AI talent platform (Next.js + FastAPI + LangGraph) with a **Natural Language to SQL** agent, multi-tenant data isolation, skills gap analysis, and an AI chatbot interface for querying employee data in plain English
- Set up **CI/CD pipelines** with GitHub Actions, CloudFormation IaC, and Docker multi-stage builds; authored CloudWatch structured logging and observability dashboards across all production deployments

Projects

GhostWriterAI – ML-Powered Multi-Agent Content SaaS | *React.js, Node.js, FastAPI, LangGraph, MongoDB, Redis*

- Built a full-stack AI SaaS platform from scratch — React.js + TypeScript frontend with Tailwind CSS, responsive across desktop and mobile, consuming a FastAPI backend with **39+ REST API endpoints** and real-time SSE streaming generation
- Designed a **5-agent LangGraph pipeline** orchestrating Validator, Strategist, Writer, Visual, and Optimizer agents via Celery task queues and the Gemini API; delivered **50+ active users** and **200+ AI content generations** in production
- Reduced LLM token consumption by **40%** through structured prompt engineering and a RAG pipeline (ChromaDB) for brand-consistent, context-aware output; implemented Redis rate limiting (30 req/min) and JWT/OAuth 2.0 auth
- Deployed via Docker + Nginx reverse proxy on Render/Vercel with **GitHub Actions CI/CD** pipeline, PostgreSQL + Alembic migrations, and structured Pytest test suites — full production-grade deployment cycle

InferX – Full-Stack MLOps Platform | *React.js, Next.js, FastAPI, PostgreSQL, Redis, Docker*

- Architected a full-stack ML model deployment SaaS — **Next.js App Router** frontend (React 19, TypeScript, Tailwind CSS, Framer Motion) with a real-time analytics dashboard showing inference trends, request volume, and error rates via Recharts
- Built **35+ REST API endpoints** (FastAPI) for model versioning, inference, API key management, RBAC permissions, and webhook delivery; engineered a **Redis LRU caching** layer reducing prediction latency **98%** (200ms → 2ms)
- Implemented JWT/OAuth 2.0 dual auth, Argon2 password hashing, HMAC-signed webhooks, token-bucket rate limiting across 8 tiers, and **77% Pytest test coverage** (39+ test suites) with Pydantic-validated schemas
- Containerized with Docker multi-stage builds (**65% image size reduction**), Nginx reverse proxy, and GitHub Actions CI/CD; designed automatic model versioning with hot-swap via Redis cache invalidation

Technical Skills

Languages: JavaScript (ES2022+), TypeScript, Python, SQL, C++, HTML5, CSS3, Bash/Shell

Frontend: React.js, Next.js (App Router), React Native, Vite, Tailwind CSS, Material UI, Bootstrap, Framer Motion, Zustand, TanStack Query, shadcn/ui, Radix UI, Responsive Design

Backend & APIs: Node.js, Express.js, FastAPI, REST API Design, GraphQL, WebSockets, Server-Sent Events, Microservices

Databases: MongoDB, PostgreSQL, Redis, SQLite – schema design, query optimization, indexing

AI/ML & SaaS: LangGraph, LangChain, RAG pipelines, OpenAI API, Gemini API, Anthropic Claude, prompt engineering, NL-to-SQL, ChromaDB, Qdrant, vector search

Cloud & DevOps: AWS (Lambda, API Gateway, S3, Cognito, CloudWatch, CloudFormation, ECS), Docker, Nginx, GitHub Actions, CI/CD, Vercel, Render

Testing & Quality: Pytest, Pydantic, SQLAlchemy, Alembic, Zod, TDD, schema validation, 77%+ test coverage

System Design: Event-driven architecture, serverless, offline-first mobile, multi-tenancy, RBAC, caching strategies, scalability patterns

Achievements

- **LeetCode Knight (1887 rating, Top 4.7% globally)** – achieved global ranks of **743** and **822** in Weekly Contests 403 & 416 (35,000+ participants); solved **800+** problems across LeetCode, Codeforces, CodeChef
- Finalist at **HackFest 2024 (IIT Dhanbad)** – built and shipped a working full-stack product under time constraints against 100+ competing teams
- Grew **GhostWriterAI** to **50+ active users** organically with 200+ AI content generations on a self-funded, fully deployed production ML SaaS system
